

Educational Partnerships for Success

Ensuring an Accessible Learning Environment for Nontraditional Students

YuJa's comprehensive set of features across video, digital accessibility, test proctoring, and student engagement platforms can contribute significantly to supporting disadvantaged students.

- First Generation
- English Language Learners
- Dual-Enrolled
- Pell-Eligible
- Veterans or Active Duty Military
- Disabled Students
- Over Age 24
- Parents
- Transfer Students

The YuJa Video Platform provides multilingual support for **English language learners**, including captions and translations in dozens of languages to aid in language acquisition. It also allows students to select their preferred language.

“

“Video is so much more powerful than just a visual. It connects students in another way, adding a personal touch.”

Jon Johnson
Dean of Digital Learning
Red Rocks Community College

Video tutorials can help guide students through learning platforms to support those who may not have prior exposure to higher education, such as **first-generation students**.

Pell-eligible students benefit from YuJa’s suite of ed-tech tools with flexible learning opportunities that enable them to learn at their own pace. Students without reliable access to transportation can save on transportation costs by attending online courses.

With YuJa, nontraditional students, such as **parents, active-duty military members and veterans**, have 24/7 access to their educational materials, which accommodates work schedules, family responsibilities, and accommodates potential challenges they may face.

Students with disabilities who rely on assistive technology have access to a host of accessibility features: closed captions, alternative formats, website accessibility options, and more. Electronic Braille, math formats, an immersive reader, text-to-speech, high-contrast, and plain text are just some of the alternative formats available.

All students, including **dual-enrolled students**, can benefit from interactive learning with quizzes, gamification, and collaborative projects. Provide content in a variety of multimedia formats, from video lectures to transcripts, and more, which cater to various learning styles.

Create an inclusive and supportive learning environment for nontraditional students, addressing their unique needs and helping them succeed academically. YuJa’s comprehensive set of features across video, digital accessibility, test proctoring, and student engagement platforms can contribute significantly to supporting disadvantaged students.

“One thing we’ve learned about our student population is that even though they may not have access, they may also be afraid to let their teachers know that they don’t have access, for whatever reason. YuJa Panorama gave a voice to students who were super shy or feeling isolated about their course content.”

Dr. Maia Smith
Ed.D, Associate Director of Learning
South Louisiana Community College
