Why Digital Accessibility Matters

YuJa EqualGround helps organizations meet compliance standards, improve user experiences, and create an inclusive digital environment for all.

## The Reality: Digital Barriers Affect Everyone

More than 1 in 4 adults (28.7%) in the United States has a disability that impacts their daily life, the CDC reports. For many, the web isn't just convenient—it's essential for work, education, healthcare, and social connection.

Yet 94.8% of websites fail to meet basic accessibility standards, the WebAIM Million report states, creating unnecessary barriers that exclude millions of users. **The average website has 51 accessibility errors per page.**

ADA, Section 508, and WCAG compliance isn't optional; it's required by law. The bottom line? Organizations can't ignore web and app accessibility.

Ultra Dynamic
Our Mission

Our mission is to assess and improve accessibility in educational institutions, ensuring that all students can thrive in an inclusive learning environment. We work with schools, universities, and other educational organizations to identify barriers to accessibility and provide practical solutions.

Accessibility Audits:
Comprehensive assessments to identify and eliminate barriers in educational environments.

Training and Workshops
Interactive sessions to empower educators and promote inclusive practices.

Consultation Services
Expert advice and ongoing support to implement effective accessibility strategies.

Centralize and Enforce Digital Accessibility Policies

Create Policy
Policies can be applied to websites and are initiated with scans to retrieve information based on their rules.

1 Choose Policy Type   2 Add Policy Details   3 Review and Confirm

Choose the type of policy you would like to create. Each policy type has specific rules that can be established.

Content
Content relates to elements of a web page, including the title, URL, text on the page, meta descriptions, link text, and overall page structure.

Media
Media relates to information regarding files, including the type of file, where it is stored, when it was uploaded, and pages that link to it.

Document
Document relates to the type of document, its location, size, upload date, and pages that link to it.
