# YuJa Lumina Video Platform Accessibility Conformance Report

# WCAG Edition

**(Based on VPAT® Version 2.5)**

## Name of Product/Version:

YuJa Lumina Video Platform

## Report Date:

June 2026

## Product Description:

The YuJa Lumina Video Platform provides an all-in-one Video Content Management System (Video CMS) that allows educational institutions to store, organize, share, and stream media content efficiently.

## Contact Information:

YuJa Accessibility Department
Email: accessibility@yuja.com

## Notes:

This report evaluates the accessibility conformance of all pages across the Lumina Platform.

## Evaluation Methods Used:

YuJa Lumina Video Platform was evaluated for WCAG 2.2 Level AA compliance using a combination of automated tools, manual testing, and validation across multiple browsers, including Google Chrome, Firefox, and Microsoft Edge.

## Manual Evaluation Tools:

- NVDA, JAWS for Windows
- Keyboard navigation
- WebAIM Colour Contrast Checker
- Chrome Developer Tools

## Automated tools:

- axe DevTools
- YuJa EqualGround Accessibility Governance Platform
- WAVE (WebAIM) Chrome extension

# Applicable Standards/Guidelines

This report covers the degree of conformance for the following accessibility standard/guidelines:

| Standard/Guideline | Included In Report |
|---|---|
| Web Content Accessibility Guidelines 2.0 | Level A (Yes)<br>Level AA (Yes)<br>Level AAA (No) |
| Web Content Accessibility Guidelines 2.1 | Level A (Yes)<br>Level AA (Yes)<br>Level AAA (No) |
| Web Content Accessibility Guidelines 2.2 | Level A (Yes)<br>Level AA (Yes)<br>Level AAA (No) |

# Terms

The terms used in the Conformance Level information are defined as follows:

- **Supports**: The functionality of the product has at least one method that meets the criterion without known defects or meets with equivalent facilitation.
- **Partially Supports**: Some functionality of the product does not meet the criterion.
- **Does Not Support**: The majority of product functionality does not meet the criterion.
- **Not Applicable**: The criterion is not relevant to the product.
- **Not Evaluated**: The product has not been evaluated against the criterion. This can only be used in WCAG Level AAA criteria.

# WCAG 2.x Report

Note: When reporting on conformance with the WCAG 2.x Success Criteria, they are scoped for full pages, complete processes, and accessibility-supported ways of using technology as documented in the WCAG 2.0 Conformance Requirements.

## Table 1: Success Criteria, Level A

| Criteria | Conformance Level | Remarks and Explanations |
|---|---|---|
| 1.1.1 Non-text Content (Level A) | Supports | All non-text content presented to the user has a text alternative that serves the same purpose. Assistive technologies don't ignore pure decorative content. |
| 1.2.1 Audio-only and Video-only (Prerecorded) (Level A) | Supports | The platform does not host standalone prerecorded audio or video media that lacks accessible alternatives. All prerecorded audio-only content is accompanied by text transcripts, and video-only content includes text or audio descriptions. |
| 1.2.2 Captions (Prerecorded) (Level A) | Supports | All prerecorded synchronized media (videos with audio) include accurate, synchronized captions for the spoken language and relevant environmental sounds. |
| 1.2.3 Audio Description or Media Alternative (Prerecorded) (Level A) | Supports | All prerecorded synchronized media with visual content include either a synchronized audio description track or a comprehensive descriptive text transcript that captures all meaningful visual information. |
| 1.3.1 Info and Relationships (Level A) | Partially Supports | Most information and structural relationships are programmatically determinable, with a few minor exceptions across the platform where labels or structural markup are missing. |
| 1.3.2 Meaningful Sequence (Level A) | Supports | The reading order is easy to follow and intuitive. |
| 1.3.3 Sensory Characteristics (Level A) | Supports | Instructions do not depend only on shape, colour, size, position, direction, or sound to explain how to use or understand the content. |

| | | |
|---|---|---|
| **1.4.1 Use of Color** (Level A) | Supports | Color is not used as the only visual means of conveying information, indicating an action, prompting a response, or distinguishing a visual element. |
| **1.4.2 Audio Control** (Level A) | Supports | The user is provided with full, accessible controls to pause, stop, or adjust the volume of the audio independently. |
| **2.1.1 Keyboard** (Level A) | Supports | All functionality of the content is operable through a keyboard interface without requiring specific timings for individual keystrokes. |
| **2.1.2 No Keyboard Trap** (Level A) | Partially Supports | Most areas of the platform allow the user to move keyboard focus into and out of components. However, there is one component where an unintentional keyboard trap occurs, preventing the user from navigating away using only the keyboard interface. |
| **2.1.4 Character Key Shortcuts** (Level A 2.1 and 2.2) | Supports | Keyboard shortcuts on the platform do not rely solely on letters, punctuation, numbers, or symbols. |
| **2.2.1 Timing Adjustable** (Level A) | Not Applicable | There is no time limit set on the platform pages. |
| **2.2.2 Pause, Stop, Hide** (Level A) | Supports | Content can generally be paused, stopped, or hidden when it moves or updates automatically, though there is one instance where this control is not available. |
| **2.3.1 Three Flashes or Below Threshold** (Level A) | Supports | The platform does not have anything that flashes more than three times per second. |
| **2.4.1 Bypass Blocks** (Level A) | Supports | A mechanism is available to bypass blocks of content that are repeated on multiple Web pages. |

| | | |
|---|---|---|
| **2.4.2 Page Titled** (Level A) | Supports | The titles are present on the webpages. |
| **2.4.3 Focus Order** (Level A) | Partially Supports | Most interactive components follow a logical focus order, with occasional exceptions in specific, complex UI elements or dynamic sections. |
| **2.4.4 Link Purpose (In Context)** (Level A) | Supports | The purpose of the link can be determined from the link text. |
| **2.5.1 Pointer Gestures** (Level A 2.1 and 2.2) | Not Applicable | Multipoint or path-based gestures are not necessary for operating functionality within the pages. |
| **2.5.2 Pointer Cancellation** (Level A 2.1 and 2.2) | Supports | Functionality that can be operated using a single pointer. |
| **2.5.3 Label in Name** (Level A 2.1 and 2.2) | Supports | For user interface components with labels that include text or images of text, the name contains the text that is presented visually. |
| **2.5.4 Motion Actuation** (Level A 2.1 and 2.2) | Not Applicable | There is no functionality triggered by moving the device or by user movement. |
| **3.1.1 Language of Page** (Level A) | Supports | The language of the page is specified through the use of the `lang` attribute. |
| **3.2.1 On Focus** (Level A) | Supports | The elements “on focus” do not cause significant changes to the screens. |
| **3.2.2 On Input** (Level A) | Supports | The elements “on input” do not cause significant changes to the screens. |
| **3.2.6 Consistent Help** (Level A 2.2 only) | Supports | Web pages contain help mechanisms, and those mechanisms are repeated on multiple web pages. |
| **3.3.1 Error Identification** (Level A) | Supports | The item that is in error is identified, and the error is described to the user in text. |

| | | |
|---|---|---|
| **3.3.2 Labels or Instructions** (Level A) | Supports | Labels are provided where user input is expected. |
| **3.3.7 Redundant Entry** (Level A 2.2 only) | Supports | The user does not have to re-enter any type of information. |
| **4.1.2 Name, Role, Value** (Level A) | Partially Supports | Standard user interface components support programmatic name and role determination, except for certain custom components generated by scripts. |

## Table 2: Success Criteria, Level AA

| Criteria | Conformance Level | Remarks and Explanations |
|---|---|---|
| **1.2.4 Captions (Live)** (Level AA) | Supports | Any live synchronized media streams or broadcasts integrated into the platform include real-time, synchronized captions for all spoken content and auditory information. |
| **1.2.5 Audio Description (Prerecorded)** (Level AA) | Supports | Synchronized audio descriptions are systematically integrated into all prerecorded video elements across the platform. |
| **1.3.4 Orientation** (Level AA 2.1 and 2.2) | Supports | The web application is not restricted to portrait or landscape orientation. |
| **1.3.5 Identify Input Purpose** (Level AA 2.1 and 2.2) | Supports | All input and form fields use the appropriate HTML5 autocomplete attributes. |
| **1.4.3 Contrast (Minimum)** (Level AA) | Supports | The visual presentation of text and images of text has a contrast ratio of 4.5:1. Large-scale text and images of large-scale text have a contrast ratio of at least 3:1. |
| **1.4.4 Resize text** (Level AA) | Supports | Without the need for assistive technology, text can be enlarged up to 200% of its original size |

| | | |
|---|---|---|
| | | without any resulting loss of content or functionality. |
| **1.4.5 Images of Text** (Level AA) | Supports | There are no images of text. |
| **1.4.10 Reflow** (Level AA 2.1 and 2.2) | Partially Supports | While the application largely supports reflow requirements without requiring two-dimensional scrolling, certain exceptions exist where specific user interface elements fail to wrap properly, leading to minor content truncation or vertical/horizontal alignment issues. |
| **1.4.11 Non-text Contrast** (Level AA 2.1 and 2.2) | Partially Supports | Non-text elements generally provide sufficient contrast, except for specific colored lines in data visualizations that fall below the 3:1 ratio against the background. |
| **1.4.12 Text Spacing** (Level AA 2.1 and 2.2) | Supports | Content on the screen remains intact when the text size is adjusted. |
| **1.4.13 Content on Hover or Focus** (Level AA 2.1 and 2.2) | Partially Supports | While content triggered by hover or focus is largely compliant, exceptions exist where tooltips or pointer-controlled overlays fail to meet the criteria for dismissibility, hoverability, or persistence. |
| **2.4.5 Multiple Ways** (Level AA) | Supports | Multiple pathways, including search functionality and persistent navigation menus, are provided to allow users to easily locate pages within the system. |
| **2.4.6 Headings and Labels** (Level AA) | Supports | The headings and labels communicate the subject or function. |
| **2.4.7 Focus Visible** (Level AA) | Supports | The keyboard focus indicator is visible and consistent across all elements. |

| | | |
|---|---|---|
| **2.4.11 Focus Not Obscured (Minimum)** (Level AA 2.2 only) | Supports | When a user interface component receives keyboard focus, the component is not entirely hidden due to author-created content. |
| **2.5.7 Dragging Movements** (Level AA 2.2 only) | Supports | There is no functionality that uses a dragging movement across all primary pages. |
| **2.5.8 Target Size (Minimum)** (Level AA 2.2 only) | Supports | All interactive targets maintain a minimum size of 24 by 24 CSS pixels, or use equivalent spacing to prevent overlapping touch targets. |
| **3.1.2 Language of Parts** (Level AA) | Supports | No content is in a different language on the English-language website. |
| **3.2.3 Consistent Navigation** (Level AA) | Supports | Navigational mechanisms that are repeated on multiple Web pages within a set of Web pages occur in the same relative order each time they are repeated. |
| **3.2.4 Consistent Identification** (Level AA) | Supports | The elements are labelled the same across multiple pages. |
| **3.3.3 Error Suggestion** (Level AA) | Supports | If an input error is automatically detected and suggestions for correction are known, then the suggestions are provided to the user, unless it would jeopardize the security or purpose of the content. |
| **3.3.4 Error Prevention (Legal, Financial, Data)** (Level AA) | Not Applicable | The web app does not collect legal, financial or secure data. |
| **3.3.8 Accessible Authentication (Minimum)** (Level AA 2.2 only) | Supports | A cognitive function test (such as remembering a password or solving a puzzle) is not required for any step in an authentication process. |
| **4.1.3 Status Messages** (Level AA 2.1 and 2.2) | Supports | The status messages on the website are present. |
