

## Web Accessibility Requirements

Provide your company's policy or commitment statement regarding electronic accessibility.

### Compliance with All Federal, State and Local Regulations

YuJa Corporation believes we comply with all known regulations, policies, and laws in the jurisdictions and sectors that we operate in. Given an ever-changing compliance landscape, we constantly review changes to ensure we continue to remain in compliance with both the spirit and letter of applicable regulations.

<b>Data Disclosure and FERPA</b>	YuJa Inc. does not disclose, release or sell any customer data to external entities. With specific regard to FERPA, we comply with all requirements regarding maintenance and disclosure of student data.
<b>Privacy Policies</b>	YuJa maintains up-to-date compliance documentation of all state-level privacy policies, including California. Detailed questions on specific state privacy policy laws may be directed to our corporate counsel at Goodwin Proctor LLP or your designated Business Lead.
<b>508 / VPAT Assessment</b>	YuJa extensively tests our platforms to ensure that the system is usable by a broad cross-section of users. We provide our Section 508 VPAT review for download and review by all institutions. While there are no known gaps identified during Section 508 review, we constantly evaluate new features and systems for conformance with these specifications.
<b>Liability and Security Insurance Coverage</b>	YuJa Inc. and its employees are insured by General Liability Commercial Insurance, Worker's Compensation Insurance, and Professional Liability Insurance (Errors & Omissions), including Privacy and Security Liability.
<b>Patriot Act</b>	YuJa Corporation's physical data center provider, Amazon Web Services (AWS) completely complies with the Patriot Act. More information on this can be found at the following "shortened" URL: <a href="http://bit.ly/2myc3rP">http://bit.ly/2myc3rP</a>

**Who in your company is responsible for the electronic accessibility policy and compliance (provide contact information)?**

Technology compliance with applicable regulations is the responsibility of our Chief Technology Officer and Chief Business Officer and their related functional teams.

**Do you have an accessibility function or team responsible for technical development?**

**Describe its role in your organization.**

YuJa Corporation occasionally uses outside consulting services and products to advise our Product Team on issues regarding Accessibility. The specific responsibility on Accessibility rests with the Product Team who is directly overseen by the Chief Technology Officer.

**How does your company achieve compliance with IT accessibility standards?**

YuJa Corporation does not believe any product truly achieves a final state of accessibility. We believe accessibility is fundamentally important to the communities we serve. It is the pursuit of this vision that helps steer our Product Roadmap to new accessibility tools and techniques. While we believe that our product exceeds the standard accessibility requirement, we constantly re-evaluate our product and practices to further improve our product's usability by all members of society.

**Describe the testing protocols you use to assess the accessibility of your product/service.**

Accessibility is part of our standard comprehensive test passes. In the event a newly release capability does not meet the letter or spirit of an accessibility guideline or policy, this is filed as a Priority 1 bug (representing the equivalent of a "work stoppage with no known workaround") and addressed accordingly.

**Can you provide live or pre-recorded demonstrations of the accessibility of your product?**

Yes.

**How do you assure that you keep your product current with changing legal requirements and accessibility best practices?**

YuJa Corporation constantly surveys both the regulatory and also competitive landscape for accessibility tools and best practices. This information is provided to the Product Team to ensure the YuJa Enterprise Video Platform meets these new requirements. Our Continuous Model enabled by an agile development process ensures any updates or areas of non-compliance are addressed.

## Web Accessibility Requirements Compliance Form

Requirement	Do you comply with this requirement? Answer: yes, no, or partially.	If not compliant, describe remediation plans (include start and end dates). For each area of noncompliance, suppliers are expected to describe any planned remediation roadmaps, including timelines and steps that will be taken to achieve full compliance, as well as interim workarounds to enable access by individuals with disabilities.
Non-text Content: All non-text content that is presented to the user has a text alternative that serves the equivalent purpose.	Yes	The YuJa Enterprise Video Platform uses alt-text to provide equivalent description of non-textual content.
Audio-only and Video-only (Prerecorded): For prerecorded audio-only and prerecorded video-only media, the following are true, except when the audio or video is a media alternative for text and is clearly labeled as such: Prerecorded Audio-only: An alternative for time-based media is provided that presents equivalent information for prerecorded audio-only content; Prerecorded Video-only: Either an alternative for time-based media or an audio track is provided that presents equivalent information for prerecorded video-only content.	Yes	To augment pre-recorded audio and/or video, we provide the following: <ol style="list-style-type: none"> <li>1. Automatically generated voice-to-text caption which is a time-sequenced</li> <li>2. Automatically generated voice-to-text transcript file including ability to download as a PDF.</li> <li>3. Ability to add a secondary audio description track that provides the ability to create enhanced time-based descriptive alternatives.</li> </ol>
Captions (Prerecorded): Captions are provided for all prerecorded audio content in synchronized media, except when the media is a media alternative for text and is clearly labeled as such.	Yes	The YuJa Enterprise Video Platform provides captioning abilities in two key ways: <ol style="list-style-type: none"> <li>1) Ability to perform the same auto-captioning capabilities as with the video content</li> <li>2) Ability to associate a human-captioned file created via an external source</li> </ol>

Audio Description or Media Alternative (Prerecorded): An alternative for time-based media or audio description of the prerecorded video content is provided for synchronized media, except when the media is a media alternative for text and is clearly labeled as such.	Yes	The YuJa HTML5-based Media Player offers the ability to associate a secondary, time-synchronized Audio Description track.
Captions (Live): Captions are provided for all live audio content in synchronized media.	No	YuJa Corporation is not aware of any caption providers that provide cost-effective live captioning services. In the event that this situation changes, YuJa's Professional Services group is committed to providing the necessary integration with this provider.
Audio Description (Prerecorded): Audio description is provided for all prerecorded video content in synchronized media.	Yes	The YuJa HTML5-based Media Player offers the ability to associate a secondary, time-synchronized Audio Description track.
Info and Relationships: Information, structure, and relationships conveyed through presentation can be programmatically determined or are available in text.	Yes	Entity relationships within YuJa are defined hierarchically and appropriate linear navigation elements are provided. Navigation elements are text-based and can be utilized in a mouse-free manner alongside screen-readers.
Meaningful Sequence: When the sequence in which content is presented affects its meaning, a correct reading sequence can be programmatically determined.	Yes	Individual media elements, chiefly videos within the Media Channel (playlist), do not have changes in meaning based on their reading order.
Sensory Characteristics: Instructions provided for understanding and operating content do not rely solely on sensory characteristics of components such as shape, size, visual location, orientation, or sound.	Yes	Navigation elements and entities are tagged with alternative text to supplement any sensory characteristics being utilized.

<p>Use of Color: Color is not used as the only visual means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.</p>	<p>Yes</p>	<p>Navigation elements and entities are tagged with alternative text to supplement any color characteristics being utilized.</p>
<p>Audio Control: If any audio on a Web page plays automatically for more than 3 seconds, either a mechanism is available to pause or stop the audio, or a mechanism is available to control audio volume independently from the overall system volume level.</p>	<p>Yes</p>	<p>Elements within the YuJa Enterprise Video Platform do not play automatically.</p>
<p>Contrast (Minimum): The visual presentation of text and images of text has a contrast ratio of at least 4.5:1, except for the following:  Large Text: Large-scale text and images of large-scale text have a contrast ratio of at least 3:1;  Incidental: Text or images of text that are part of an inactive user interface component, that are pure decoration, that are not visible to anyone, or that are part of a picture that contains significant other visual content, have no contrast requirement. Logotypes: Text that is part of a logo or brand name has no minimum contrast requirement.</p>	<p>Yes</p>	<p>The YuJa Enterprise Video Platform's default colors related to navigate and interface elements offer sufficient contrast, as well as, provide branding elements that enable the organization to achieve sufficient contrast levels.</p>
<p>Resize text: Except for captions and images of text, text can be resized without assistive technology up to 200 percent without loss of content or functionality.</p>	<p>Yes</p>	<p>The YuJa Enterprise Video Platform's fonts are rendered via modern HTML and CSS that conforms and adapts to browser-requested and screenreader-requested resize requests without loss of functionality.</p>
<p>Images of Text: If the technologies being used can achieve the visual presentation, text is used to convey information rather than images of text except for the following:</p>	<p>Yes</p>	<p>In most instances, images are not used to represent textual elements. However, instances where this is done, the application provides alternative text ("alt text") to convey meaning.</p>

<p>customized to the user's requirements; Essential: A particular presentation of text is essential to the information being conveyed.</p>		
<p>Keyboard: All functionality of the content is operable through a keyboard interface without requiring specific timings for individual keystrokes, except where the underlying function requires input that depends on the path of the user's movement and not just</p>	Yes	The keyboard can be used without requiring any unique timing characteristics.
<p>No Keyboard Trap: If keyboard focus can be moved to a component of the page using a keyboard interface, then focus can be moved away from that component using only a keyboard interface, and, if it requires more than unmodified arrow or tab keys or other standard exit methods, the user is advised of the method for moving focus away.</p>	Yes	The keyboard interface mechanism is not modified in any unique manner.
<p>Timing Adjustable: For each time limit that is set by the content, at least one of the following is true: Turn off: The user is allowed to turn off the time limit before encountering it; or Adjust: The user is allowed to adjust the time limit before encountering it over a wide range that is at least ten times the length of the default setting; or Extend: The user is warned before time expires and given at least 20 seconds to extend the time limit with a simple action (for example, "press the space bar"), and the user is allowed to extend the time limit at least ten times; or Real-time activity; or 20 Hour.</p>	Yes	The YuJa Enterprise Video Platform does not have non real-time event related that imposes a time limited action within the YuJa Enterprise Video Platform

<p>Pause, Stop, Hide: For moving, blinking, scrolling, or auto-updating information, all of the following are true: Moving, blinking, scrolling: For any moving, blinking or scrolling information that (1) starts automatically, (2) lasts more than five seconds, and (3) is presented in parallel with other content, there is a mechanism for the user to pause, stop, or hide it unless the movement, blinking, or scrolling is part of an activity where it is essential.</p>	Yes	Any instances where the mentioned actions are used to convey meaning, we provide a mechanism to hide or stop the action.
<p>Three Flashes or Below Threshold: Web pages do not contain anything that flashes more than three times in any one second period, or the flash is below the general flash and red flash</p>	Yes	Flashes are not used to convey meaning with the application.
<p>Bypass Blocks: A mechanism is available to bypass blocks of content that are repeated on multiple Web pages.</p>	Yes	The YuJa Enterprise Video Platform does not use repeated blocks of content shown on any page within the application
<p>Page Titled: Web pages have titles that describe topic or purpose.</p>	Yes	The application utilizes a "breadcrumb" hierarchy to convey the full context of a page title.
<p>Focus Order: If a Web page can be navigated sequentially and the navigation sequences affect meaning or operation, focusable components receive focus in an order that preserves meaning.</p>	Yes	The YuJa Enterprise Video Platform satisfies this requirement.
<p>Link Purpose (In Context): The purpose of each link can be determined from the link text alone or from the link text together with its programmatically determined link context.</p>	Yes	The YuJa Enterprise Video Platform satisfies this requirement.

Multiple Ways: More than one way is available to locate a Web page within a set of Web pages.	Yes	The YuJa Enterprise Video Platform satisfies this requirement.
Headings and Labels: Headings and labels describe topic or purpose.	Yes	The YuJa Enterprise Video Platform satisfies this requirement.
Focus Visible: Any keyboard operable user interface has a mode of operation where the keyboard focus indicator is visible.	Yes	To use the keyboard's focus as a mode of navigation we recommend using a screen-reader which is capable of placing an optional on-screen indicator.
Language of Page: The default human language of each Web page can be programmatically determined.	Yes	The page language is encoded via a standard HTML tag.
Language of Parts: The human language of each passage or phrase in the content can be programmatically determined except for proper names, technical terms, words of indeterminate language, and words or phrases that have become part of the vernacular of the immediately surrounding text.	Yes	The YuJa Enterprise Video Platform satisfies this requirement.
On Focus: When any component receives focus, it does not initiate a change of context.	Yes	The YuJa Enterprise Video Platform satisfies this requirement.
On Input: Changing the setting of any user interface component does not automatically cause a change of context unless the user has been advised of the behavior before using the component.	Yes	The YuJa Enterprise Video Platform satisfies this requirement.
Consistent Navigation: Navigational mechanisms that are repeated on multiple Web pages within a set of Web pages occur in the same relative order each time they are repeated, unless a change	Yes	The YuJa Enterprise Video Platform satisfies this requirement.
Consistent Identification: Components that have the same	Yes	The YuJa Enterprise Video Platform satisfies this requirement.

functionality within a set of Web pages are identified consistently.		
Error Identification: If an input error is automatically detected, the item that is in error is identified and the error is described to the user in text.	Yes	The YuJa Enterprise Video Platform satisfies this requirement.
Labels or Instructions: Labels or instructions are provided when content requires user input.	Yes	The YuJa Enterprise Video Platform satisfies this requirement.
Error Suggestion: If an input error is automatically detected and suggestions for correction are known, then the suggestions are provided to the user, unless it would jeopardize the security or purpose of the content.	Yes	The YuJa Enterprise Video Platform satisfies this requirement.
Error Prevention (Legal, Financial, Data): For Web pages that cause legal commitments or financial transactions for the user to occur, that modify or delete user-controllable data in data storage systems, or that submit user test responses, at least one of the following is true: Reversible: Submissions are reversible.	Yes	The YuJa Enterprise Video Platform satisfies this requirement.
Parsing: In content implemented using markup languages, elements have complete start and end tags, elements are nested according to their specifications, elements do not contain duplicate attributes, and any IDs are unique, except where the specifications allow these features.	Yes	The YuJa Enterprise Video Platform satisfies this requirement.
Name, Role, Value: For all user interface components (including but not limited to: form elements, links, and components	Yes	The YuJa Enterprise Video Platform satisfies this requirement.

<p>generated by scripts), the name and role can be programmatically determined; states, properties, and values that can be set by the user can be programmatically set; and notification of changes to these items is available to user agents, including assistive technologies.</p>
