

# YuJa Pro Captioning

Affordable, ADA-Compliant Captioning

At YuJa, we believe in the transformative power of video. We enable organizations of all sizes to create engaging media experiences with robust, feature-rich and easy-to-use products. Designed with accessibility in mind, the YuJa Enterprise Video Platform is reviewed by third-party auditors to meet federal accessibility laws, industry best practices, and guidelines.

### Premium Quality Captioning

YuJa Pro Captioning complements our existing human-based, third-party captioning integrations to offer competitively priced human-based captioning. The integrated service provides near 100% accurate captions and transcripts to maximize content engagement and accessibility.

### Compliance & Inclusivity

In addition to the technology, users can benefit from the addition of two human layers of review to achieve 99% accuracy on captioning and transcription. We allow you to adhere to the ADA, as well as meet FCC, Section 508, and WCAG 2.0 compliance. In doing so, you'll provide equal opportunity to those who are deaf or hard of hearing, but also make your content accessible and more engaging to all students.

### Scalability

Our solution is both robust and scalable. Whether you use machine or human-generated captions, the technology and complementary transcriber community are available to accommodate any job, large or small, and meet any turnaround time.

### Support

We offer a seamless experience, but should you encounter any issues, we offer an enterprise-grade and dedicated support team to resolve issues as quickly as possible.

An integrated enterprise video platform to fit any organization
